

Using Ad-Aware SE Personal

PROVIDED BY: Computerworks 883-5540 and 894-7575

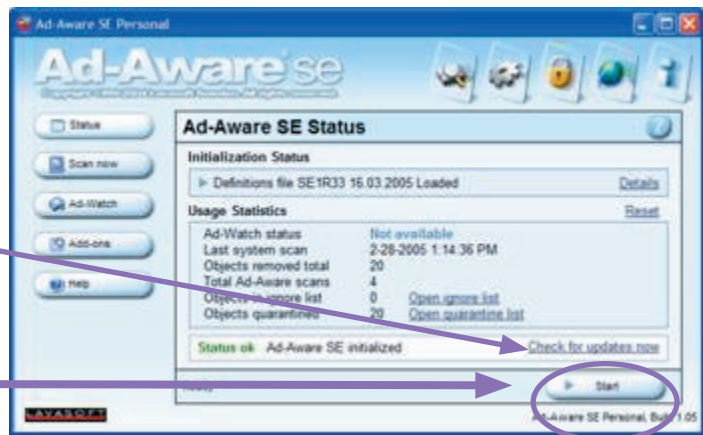

Start the program by DOUBLE-CLICKing on the Ad Aware icon (on desktop)

When the program loads you should see a screen like this:

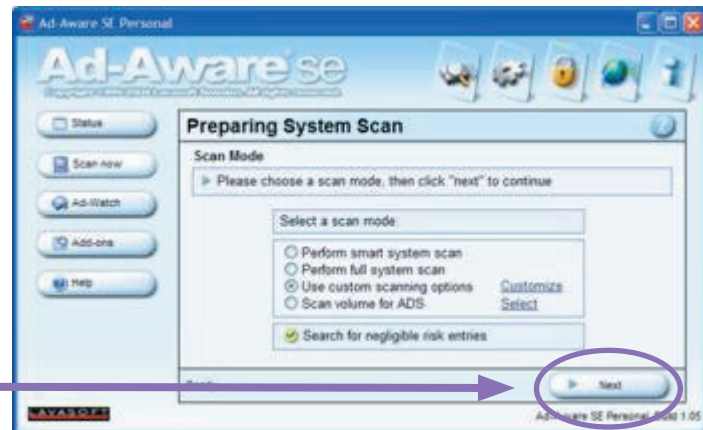

Check for spyware definitions and program updates FIRST! (Additional dialog boxes will appear - follow prompts) ... then

Press the START button.

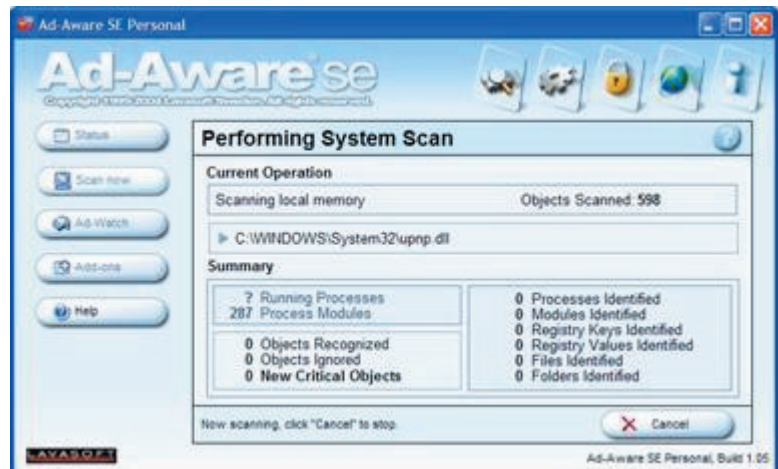

You will see a screen like this

Press the NEXT button without changing any settings. This will initiate the scan process.

The image, below, shows the beginning of the scan process.

When the scan is finished You will see the following screen if any spyware or suspicious objects are found. The red Tick will be jumping and, if you have speakers, an obnoxious noise will be sounded, to alert you. Various item counts will be incremented and show as RED, as well.

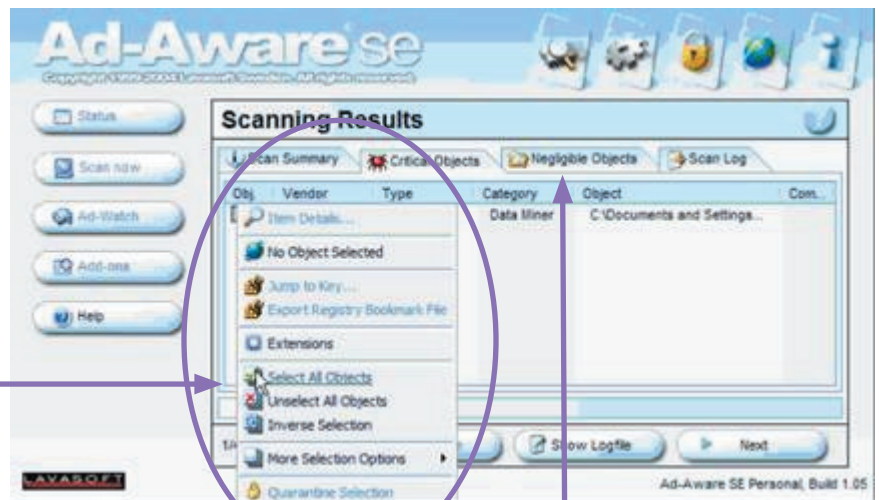

CLICK the NEXT button to proceed.

Each check box to the left of found objects MUST be filled-in with a green check mark. You can click on each box manually to accomplish this or ...

RIGHT-CLICK inside the “Results” panel to bring up a menu, from which you choose “Select All Objects”. (See below)

Perform this routine for “Negligible Objects” too, if any are found!

Click the NEXT button. Ad-Aware will quarantine and delete all of the selected objects.

You are done! Click in upper right corner to quit Ad-Aware.
